DATE MAILED: 09/26/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/720,173

Applicant(s)

JOHNSTONE, PETER

Examiner

Sheeba Ahmed

Art Unit

1773

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☐ Claim(s) 1-28 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) 1-3, 9-12, 14, 15, 16, 18-24, 26-28 is/are rejected.
- 7) ☐ Claim(s) 4-8, 13, 17, and 25 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 3. 6) ☐ Other: .

DETAILED ACTION

Claim Objections

1. Claims 4-8, 13, 17, and 25 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim shall not serve as a basis for any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, claims 4-8, 13, 16, and 18-24 have not been further treated on the merits.

Furthermore, Claims 1, 2, 14, and 15 are objected to because of the following informalities: Claims 1 and 2 are identical and claims 14 and 15 are identical, respectively. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites that the plastic material member "is relaxed by at least 5%, preferably 10%". The phrase "preferably" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 9-12, 14, 15, and 26-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin-Cocher et al. (WO 94/04419).

Martin-Cocher et al. disclose a method of wrapping loads in a stretchable film wherein the film is pre-stretched to an elongation value of about 150 to 500% so that after relaxation it presents a tension. The film may be pre-stretched in its longitudinal or transverse direction. The invention is related to wrapping palletized loads. With regards to the limitations that the plastics material member achieves either or both an improved resistance to degradation from UV light and an improved resistance to gas transmissivity, the Examiner takes the position that such material properties are inherently present in the stretched film disclosed by Martin-Cocher et al. given that the chemical composition of the film and the process of making such a stretched film as disclosed by Martin-Cocher et al. and that of the claimed invention are identical. All limitations of the claimed invention are either disclosed or inherent in the above reference.

Art Unit: 1773

4. Claims 1-3, 9-12, 14-16, 18-24, and 26-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnstone (WO 98/50219).

Johnstone (WO 98/50219) discloses a method for producing a stretch wrap plastic film and the storage of such plastic film, which has undergone stretching prior to storage on a roll (Page 1, lines 3-6). The film is pre-stretched to give a predetermined significant amount of memory and the amount of recoverable strain retained in the films falls within the range of about 20% to a maximum of total memory in the film (Page 2, lines 9-12 and 19-21). A method a wrapping a load with the plastics film is also provided and the load may be a vegetation material during the production of silage (Page 3, lines 13-15). A partially stretched film may be further stretched or re-stretched to attain the original level of stretching or in some cases even beyond the original level of stretching (Page 9, lines 1-5). . With regards to the limitations that the plastics material member achieves either or both an improved resistance to degradation from UV light and an improved resistance to gas transmissivity, the Examiner takes the position that such material properties are inherently present in the stretched film disclosed by Martin-Cocher et al. given that the chemical composition of the film and the process of making such a stretched film as disclosed by Martin-Cocher et al. and that of the claimed invention are identical. Furthermore, the Examiner takes the position that the wrapped bale of silage is inherently in an anaerobic atmosphere given that the stretched film is not gas permeable. All limitations of the claimed invention are either disclosed or inherent in the above reference.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16, 18-20, and 26-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin-Cocher et al. (WO 94/04419) in view of Orpen et al. (US 5,816,026).

Martin-Cocher et al. disclose a method of wrapping loads in a stretchable film wherein the film is pre-stretched to an elongation value of about 150 to 500% so that after relaxation it presents a tension. The film may be pre-stretched in its longitudinal or transverse direction. The invention is related to wrapping palletized loads.

Martin-Cocher et al. do not state that the palletized load that may be wrapped with their stretched film is silage.

However, Orpen teaches that it is common practice to wrap bales of silage in a stretched plastic film provided in rolls (Column 1, lines 8-11 and 66-68 and column 2, lines 1-10).

Accordingly, it would have been obvious to one having ordinary skill in the art to use the stretched plastic film disclosed by Martin-Cocher et al. to wrap a bale of silage given that Orpen particularly teaches that it is common practice to wrap bales of silage in a stretched plastic film provided in rolls. Furthermore, the Examiner takes the position

Art Unit: 1773

that the wrapped bale of silage must be in an anaerobic atmosphere given that the stretched film is not gas permeable.

Conclusion

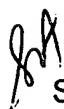

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,797,240 is related to WO94/04419.

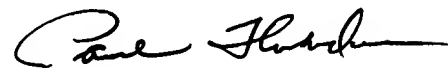

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheeba Ahmed whose telephone number is (703)305-0594. The examiner can normally be reached on Mon-Fri 8am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Thibodeau can be reached on (703)308-2367. The fax phone numbers for the organization where this application or proceeding is assigned are (703)305-5408 for regular communications and (703)305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)306-5665.
